

CARAVAN 208

Banyan Avionics removed the standard six pack vacuum and pressure primary flight instruments from the pilot and copilot cockpit instrument panels and replaced them with a Dual Garmin G600 Flat Panel Display System. The new displays were complimented by new Dual GDC-74 Air Data Computers and GRS-77 Attitude Heading Reference Systems along with a new L-3 ESI-2000 Glass standby unit. The upgrade also included dual GTN-750's, Garmin new revolutionary touchscreen displays, along with a GDL-69A which provides weather information to the displays. The Transponder was upgraded to the Garmin GTX-330 Extended Squitter Transponder for ADS-B capabilities. New instrument panels were also fabricated to complete the installation.

Key components:

- Dual Garmin G600 Flight Displays
- Dual GDC-74 ADC
- Dual GRS-77 AHRS
- Dual GTN-750's
- L-3 ESI-2000 Glass Standby Unit
